

Uninstall Local Copy of Dreamweaver

1. Go to Start >> Settings >> Control Panel >> Add or Remove Programs
2. Scroll down list of installed programs and find Dreamweaver
3. Click on Dreamweaver, then click on Remove (May ask you to confirm uninstall)
4. This will now completely remove the local copy of Dreamweaver from your machine.
5. Once uninstall is completed, close out of Add or Remove Programs by clicking on the red X.

Installing Softgrid

1. Make sure that Spybot is not running.
2. Go to Start >> Run...
3. Type in [\\inas1](#), click OK
4. Double click on the folder "service desk", then double click on the folder "Softricity Install"
5. Double click on sg.bat and allow installation to run.
6. When install is completed, reboot machine.
7. Wait for Spybot to completely run
8. Go to Start >> Programs - and you will see the new apps installed: Macromedia Dreamweaver, SPSS, Kronos for KSU, Vista for KSU

On the initial start of an application, there may be a delay, but this will only happen the first time.
